# 12. OpenClaw Application - Script Execution

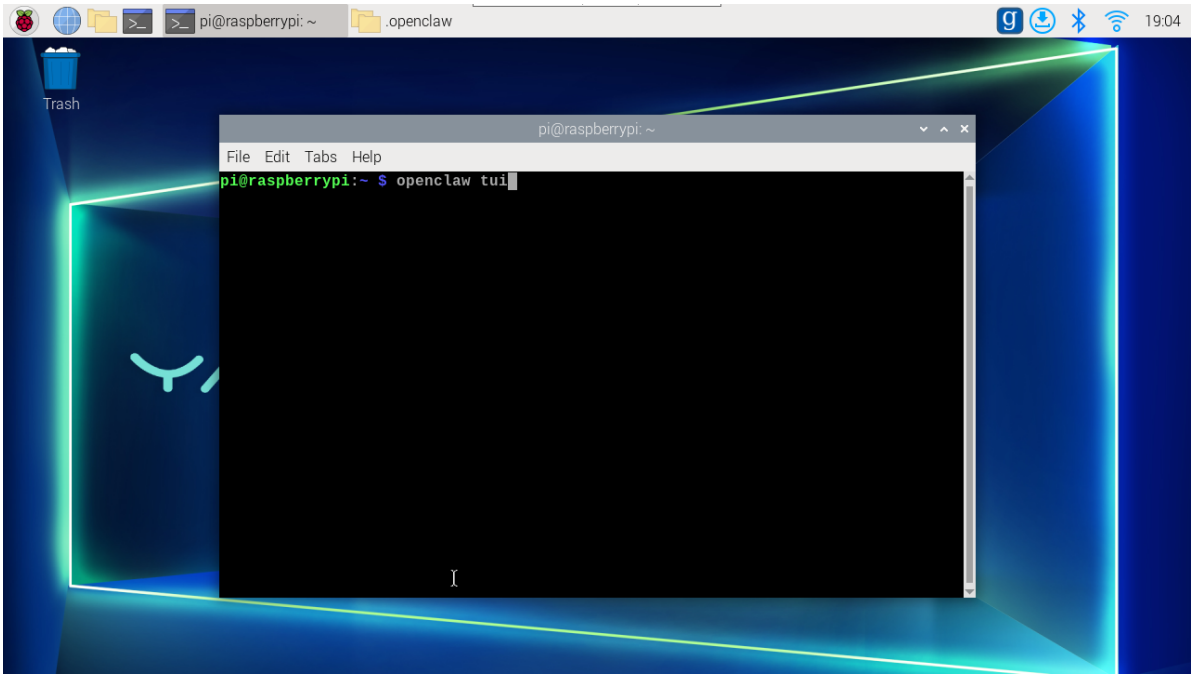
## 1. Preparations Before Use

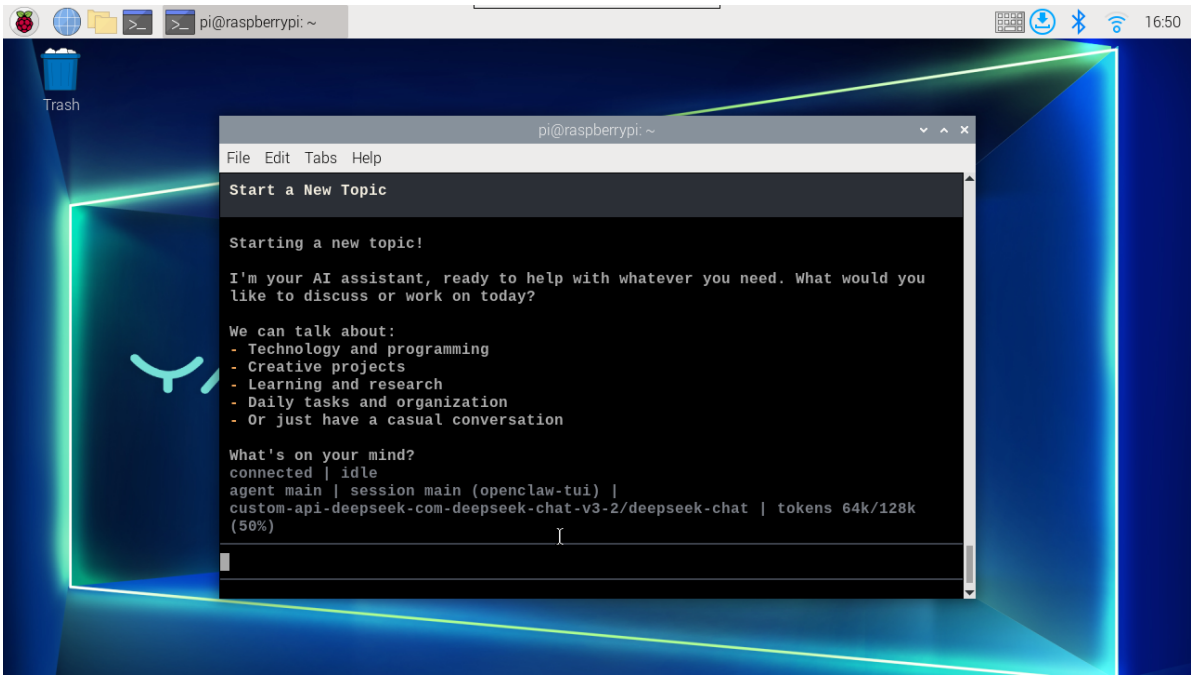
Confirm that OpenClaw has been configured and can interact normally

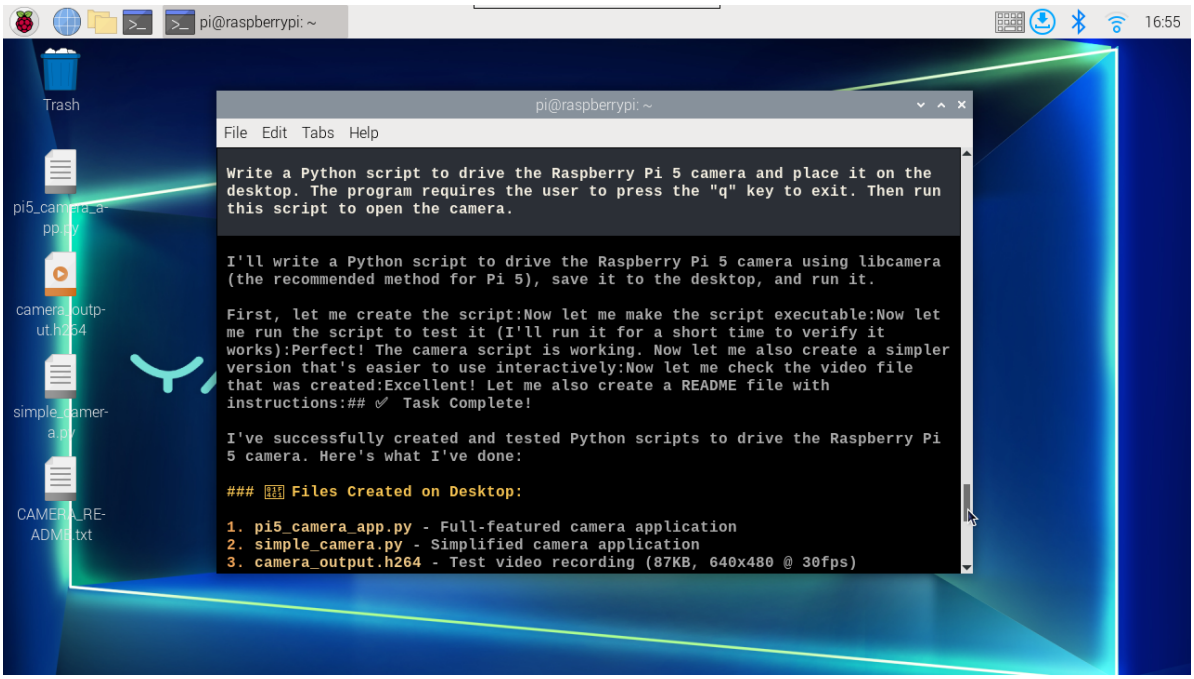
## 2. Let OpenClaw Perform Script Execution

Interact in TUI terminal

```
openclaw tui
```





Enter interactive command


```
Write a Python script to drive the Raspberry Pi 5 camera and place it on the
desktop. The program requires the user to press the "q" key to exit. Then run
this script to open the camera.
```
