[Manual Switching](#)

If you are using the factory image we provided, manual installation and configuration are not required.

This tutorial demonstrates installing Chinese input method on Raspberry Pi 5.

Input Method Installation

- Update software sources

```
sudo apt-get update
```

- Install Fcitx framework and Google Pinyin input method

```
sudo apt-get install -y fcitx fcitx-googlepinyin
```

Restart the system after installation!

Using the Input Method

Select `Fcitx Configuration` to add Google Pinyin input method

Uncheck the `Only Show Current Language` option, then select `Google PinYin` from the input method list, and finally click `OK` to close this window.

Switching Input Methods

If shortcut key switching fails, you can manually switch the input method.

Shortcut Key Switching

Use `Ctrl + Space` to switch input methods!

Manual Switching

If shortcut keys cannot switch, you can manually switch by clicking the keyboard option!
